---

PROFESSIONAL SUMMARY

Software Engineer with 1.5+ years of experience building backend services primarily using Go, with additional experience developing NestJS microservices. Experienced in designing REST APIs, implementing secure authentication and authorization using Keycloak, OAuth 2.0, OpenID Connect (OIDC), and JWT, integrating third-party APIs, and working with PostgreSQL in production environments. Focused on building reliable backend services, solving integration challenges, and designing scalable systems for production workloads.

TECHNICAL SKILLS

Languages: Go (Golang), TypeScript, Java, SQL
Backend: Go, NestJS, Spring Boot, REST APIs, Microservices
Authentication & Security: Keycloak, OAuth 2.0, OpenID Connect (OIDC), JWT, RBAC
Databases: PostgreSQL, MySQL, MongoDB
Cloud & DevOps: Docker, AWS ECS, Flyway, Goose, Git
Tools: Kong API Gateway, SQLC, Swagger/OpenAPI, Postman

PROFESSIONAL EXPERIENCE

Paywize Technologies Pvt. Ltd.
Software Engineer | Mar 2026 - Present
Associate Software Engineer | 05 Feb 2025 - Feb 2026

- Designed, developed, and maintained backend microservices primarily using Go.
- Built secure RESTful APIs for merchant onboarding, authentication, payout, collection, connected banking, reseller integrations, and identity management.
- Implemented authentication and authorization using Keycloak, OAuth 2.0, OpenID Connect (OIDC), JWT, and Role-Based Access Control (RBAC).
- Developed multi-merchant account management, merchant onboarding, reseller workflows, account-switching functionality, and the Activity Log Service.
- Integrated third-party APIs including Protean, Zoop, Surepass, Mtalkz, and other external platforms while implementing secure service-to-service communication.
- Designed and optimized PostgreSQL queries, database migrations, and data access layers using SQLC and Goose/Flyway.
- Contributed to NestJS microservices by implementing APIs, business logic, and database enhancements.
- Engineered an email integration platform using Microsoft Graph API with webhook-based real-time synchronization, polling fallbacks, email threading, attachment handling, and automated recovery for replies across user mailboxes and Microsoft 365 Groups.
- Implemented subscription lifecycle management for Microsoft Graph webhooks, including creation, renewal, failure recovery, boot-time initialization, and notification validation.
- Solved complex cross-mailbox email-threading and reply-routing scenarios while supporting both user mailboxes and Microsoft 365 Groups.
- Collaborated with cross-functional teams in Agile environments to deliver production-ready backend features, investigate issues, and support deployments.

EDUCATION

Bachelor of Engineering (Computer Science & Engineering)
Jain College of Engineering and Technology, Hubballi | 2023
